CREATIVE CORNER

FROM THE CHAIRPERSON'S DESK

Reinventing and revamping to the latest, is the cardinal ideology that defines Amity. With the influx of technology, the meaning of literacy has evolved and today digital and media literacy are in the lime-light. The release of this e-magazine truly demonstrates that we are in sync with the latest pedagogy.

The glowing inputs showcased here, put to record the endeavor of the school towards unlocking the hidden potential in each student and sculpting them into meritorious and virtuous individuals. The e-magazine indeed mirrors the wondrous journey and achievements of the school.

I congratulate the Principal, Ms. Divya Bhatia and her entire team for translating my mission, vision and ideas into reality. The e-magazine is a gigantic step as we journey into the future with dedication and determination. I am confident that imbued with the excellence and values imparted in the portals of the school all my Amitians will evolve as future leaders of this nation.

Dr. (Mrs.) Amita Chauhan

MESSAGE FROM THE PRINCIPAL

Our Founder President's triple excellence formula and "BHAAG" are instrumental in providing all Amitians an edge over their counterparts in other schools. With a visionary like our Chairperson whose "Hip Hip Hurray" and 'Amitians are the best' brings about so much cheer & enthusiasm, we at Amity Saket are motivated to do better than our best.

With the initiation of this e-newsletter we have yet another platform to connect with our students & parents. Feedback and articles from both parents and students are solicited for the upcoming issues. All the best !

Mrs. Divya Bhatia

Vasudha 2018

Vasudha is an initiative of Dr. (Mrs.) Amita Chauhan, Chairperson Amity Group of Schools and RBEF, to instill scientific temper in school children. The theme of Vasudha 2018 was 'Science Technology and Innovation for Sustainable Development' and the students across the classes took great pride in exploring various theme-based domains to showcase their innovative projects. The exhibition unveiled some simple but effective methods of conserving climate thus leading to a better tomorrow. It was a month long process where children carried out research and innovation on the projects they chose. Each of these projects were presented through models, PPTs and oratory presentations. The best selected models were then sent for further research with a scope of making prototypes and manufacturing for consumer use.

ATAL TINKERING LAB (ATL) is a work space where young minds can give shape to their ideas through hands on do-it-yourself mode; and learn innovation skills. It is installed in the **PHYSICS LAB** of our school and open for students of classes 7 to 12. The classes have been a period for the same in a week. ATL gives the students a chance to work with tools and equipment to understand the concepts of STEM (Science, Technology, Engineering and Math). ATL contains educational and learning 'do it yourself' kits and equipment on – science, electronics, robotics, open source microcontroller boards, sensors and 3D printers and computers. Other desirable facilities include meeting rooms and video conferencing facility.

Aimtoinnovate @ Altinkeringlab Farmers spend lakhs of money in buying tractors (usually 6lakhs), the tractor does limited tasks. The farmers then have to use a lot of muscular power. We have devised a solution to this problem by designing a tractor that could help farmers plough the land, mix manure, plant seeds and even work like a combined harvester!

VISITS

Empathy Visit was organized for the students of different classes from VI to IX. They visited the Akshay Pratishthan— a school for the specially abled, Nirmal Chayya—Old Age Home and Cheshire Home - differently abled in the month of August, 2018. The students spent a few hours interacting with the children and elderly people. Most of them came back with the uplifting spirit of a renewed zeal to lend a compassionate hand to those who are under privileged.

INSPIRE CAMP

Our students attended the 5 day INSPIRE CAMP organised by Shivaji College, DU, where they attended lecture given by eminent scientists and had some interesting practical sessions. They also visited the Biomedical Instrumentation Lab at NPL.
